Introduction

This document serves as a formal whistleblower report detailing, at a high level, a **coordinated effort to suppress legal records, manipulate case filings, and obstruct due process** involving state and federal government actors. The report exposes **fraudulent court docket tampering, FOIA suppression, and retaliation against individuals seeking justice**.

Whistleblower Statement

I am submitting this whistleblower report to expose a **coordinated fraud and civil rights conspiracy** involving **state and federal government actors**, including courts, agencies, and private legal platforms (**PACER, Justia, CaseText, etc...**).

My case involves **systematic manipulation of court dockets, suppression of records, fraudulent case listings, and the denial of due process rights**—amounting to **fraud upon the court, civil conspiracy, and violations of RICO, False Claims Act, and constitutional protections** to name a few, and there are several others...

Despite filing multiple complaints, including with the **FBI**, I have been apparently **erased from a number of legal records**, with **federal agencies falsely claiming no record of my report(s) exists**. This suppression has left me in immediate danger of losing my housing, access to medical care for life-threatening medical conditions, and loss of basic civil rights.

I am requesting **whistleblower protections for me and my family along with my extended family and my ex-wife and her family and her extended family** to expose the **cover-up, document falsifications, and coordinated obstruction of justice** that is preventing me from obtaining lawful redress.

I am willing to provide **substantial evidence of these violations** and seek **urgent legal intervention by a firm or firm(s)** with the expertise and knowledge to fully pursue these claims in federal court.

- **A full, federal, thorough, deep-level investigation into the suppression of legal records and obstruction of justice.**
- **Public disclosure of the systemic manipulation of court records and government accountability.**

This report is being publicly archived to ensure its existence is not erased or suppressed.

I will continue to document and expose any further suppression, within the scope of doing so without causing damages to my cases.

I have experienced a great deal of retaliation and many unlawful actions have been taken against me, and these coordinated attacks have been ongoing along with obstruction of justice, and refusal of due process, and issues involving violations that are civil, criminal, and torts, along with constitutional rights violations, the above listing is only a portion of what I have been dealing with for an extended period of time.
